DETAILED ACTION

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 9-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Leach in view of Pettibone et al. Claims are unpatentable for the same reasons set forth on page 2 of the prior office action.

Claims 9-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Leach in view of Witt et al. Note that Witt et al teach independent control of programmable upper and lower heating elements, as claimed. Note that such elements can be used singularly, or together.

Response to Arguments

Applicant's arguments filed 05-11-05 have been fully considered but they are not persuasive. Applicant's response advances that neither Leach nor Pettibone et al teach the subject matter of claim 1. However, Applicant's response is silent as to any differences between Leach, Pettibone et al and the claimed subject matter. New claims

have been rejected for the same reasons. Note also the rejection of claims 9-19 in light of the Witt et al reference.
